Search strategy and retained paths

The canonical execution graph retained 19 nodes and 22 edges, including rejected and exhausted branches. Path priority guided exploration only; it never changed evidence or finding confidence.

ACCEPTED, REJECTED, AND MUTATION PATHS

Mutation Rejected	Chris Anderson, TED -> First-party and official pages -> First-party and official pages / cost 2.627
Exhausted	Chris Anderson, TED -> First-party and official pages -> Candidate-linked Wayback history: Chris Anderson / cost 5.833
Rejected	Chris Anderson, TED -> First-party and official pages -> Universities, conferences, and publishers: Chris Anderson -> Chris Anderson - separate TED speaker profile -> (He is not, however, to be confused with the curator of TED, who has the same name.) -> Chris Anderson / cost 5.150
Accepted	Chris Anderson, TED -> First-party and official pages -> Chris Anderson - TED speaker profile -> Chris Anderson Chairman, TED -> Chris Anderson -> Identity - Chris Anderson -> Final intelligence report / cost 1.353

Coverage gaps and limitations

- Only auditable public professional sources were considered.

Usage, latency, and stopping

0 turns	0 LLM calls	3 tool calls	0 search calls
4 evidence attempts	3 network requests	0 input tokens	0 cached input tokens
0 output tokens	0 thinking tokens	0.000000 cost (USD)	1127 ms elapsed

STOP DETAIL

Resolved the TED-constrained candidate with a unique official anchor and preserved the same-name decoy as a separate rejected candidate.

Methodology and safety

EVIDENCE STANDARD

Only admitted public-professional evidence appears here. Exact source excerpts are kept distinct from structured API claims, and discovery-only snippets are not promoted into findings.

CONFIDENCE STANDARD

Finding confidence is computed from candidate-bound evidence, independent source families, contradictions, reliability, and spoofability caps. Model prose is never finding authority.

GRAPH STANDARD

The search graph records actual frontier execution, including rejected and exhausted paths. Best-first path scores guide which legal action runs next but never increase finding confidence.

SAFETY NOTE

Atlas excludes private contact enrichment, home addresses, personal phone lookup, family mapping, precise location, credentials, financial data, and high-impact decisioning. The scope is public professional intelligence only.
